## about caledonia

### A Wealth of Knowledge

Caledonia Training & Consultancy Ltd was formed in 1994 to provide training and consultancy services to the Oil and Gas Industry. Today, the company is firmly established as a quality training and consultancy provider in the UK and Overseas.

Caledonia's team of experienced and highly regarded instructors bring together a unique blend of knowledge essential for the development of "Best in Class" training courses. Instructors are all ex-oilfield personnel who have first hand experience of the Oil and Gas Industry, its environment and its people.

### Much more than Well and Completion Engineering

Throughout our 15 years of operations clients have benefited from our specialist knowledge in Well and Completions Engineering as well as our Drilling Technology experience. This experience, in conjunction with our particular training style has resulted in an effective package of Oil and Gas training courses in keeping

with industry competencies and regulations'. Caledonia Training provides the knowledge necessary to perform critical tasks in a safe, efficient and effective manner.

### Consultancy Solutions

Caledonia Training and Consultancy has an excellent and highly regarded consultancy service on a selection of industry related disciplines. We can offer Independent Training Needs Analysis's, Expert Witness Consultancy along with many other consultancy services.

### Tailored to Your Needs

All courses can be adapted to meet your companies training needs, whether it be training duration, training location or training information.

"Instructor made the course very interesting and in a relaxed and enjoyable atmosphere. Well presented and informative and easily understood."

"Excellent help and support from the tutor. He made the class feel at ease and encouraged us to ask questions about everything we were unsure of."

caledonia training provides the knowledge necessary to perform critical tasks in a safe, efficient and effective manner.

## about the training

### Training Courses

The wide range of training packages on offer from Caledonia Training help companies to develop their people by investing in their future.

Regular training includes IWCF Drilling Well Control, IWCF Well Intervention Pressure Control and IADC WellCap Drilling Well Control. By building on our global reputation for quality of service and effectiveness of training, we have broadened our portfolio to include many other courses such as Stuck Pipe Prevention Training, High Pressure/High Temperature Training, Drilling Technology Training, Introduction to the Oil and Gas Industry Training along with many more.

### Training on Your Doorstep

Caledonia have taken their courses all over the world and have provided training in countries such as Italy, Canada, Norway, Syria, Libya, Australia, Egypt, Oman, Brunei, Iran, Venezuela, Nigeria, Kazakhstan, France, Dubai, Abu Dhabi and Saudi Arabia as well as at home in

Aberdeen, Dundee, Great Yarmouth and Dorset.

### Customised Training Packages

By listening to clients particular needs we continue to develop a wide range of training courses. These can be long or short term and focus on Drilling and Completions Training, English as a Foreign Language, Management Skills, IT Training, Fire Fighting, Survival, First Aid, Geology and Environmental Studies. They enhance the knowledge already held by delegates and prepare them for future career progression.

### Extensive Training Facilities

Caledonia's main training centre is located in the industrial heart of Aberdeen. The 3,200 sq. feet facility incorporates six spacious training rooms and two well equipped drilling simulators, one of which is available for client on site training. This 'real life' simulation capacity provides students with the valuable hands on training that Caledonia promotes. The centre is IWCF, IADC WellCAP and SQA approved.
